The agency also continues to build its AGOA-related project portfolio through orientation visits, project studies, and capacity-building technical assistance in several manufacturing and agriculture subsectors in numerous countries.⁶⁸ The agency financed and assisted the early phase of the Trans Kalahari Corridor project connecting Namibia, Botswana, and South Africa. TDA also supported a NEPAD-designated priority project, the Nacala Corridor, by funding a study of the corridor's extension from Malawi and Mozambique into Zambia.⁶⁹ In September 2003, TDA, with the Ethio-American Trade and Investment Council, sponsored an Ethiopian manufacturing orientation visit to increase trade under AGOA and business contacts between the United States and Ethiopia. In addition, the TDA focused on renewable energy projects to help African global competitiveness, including the Biomass Generation Project in Ghana, the East Africa Geothermal Conference, and the coal bed methane development projects in Botswana.

Overseas Private Investment Corporation

Overseas Private Investment Corporation (OPIC) is a self-sustaining U.S. government agency that provides investment funds, project finance, and political risk insurance to U.S. businesses investing in developing nations and emerging markets around the world (table 4-13). OPIC supports small- and medium-size businesses in Africa. OPIC
